*"Never stay up on the barren heights of cleverness,  
but come down into the green valleys of silliness."*

– Wittgenstein

Publishing is under attack from all sides. New technologies have been both a boon and a bone for journalism. The spread of cryptocurrencies offers a new paradigm for independent reporting, which we are appetent to engage.

Alphachain empowers smart-contract bubble journalism, decentralising hack finance for a trustless news protocol with a deep commitment to verified insecurity. Microtransactions enable macro-story publication, which readers access through a token-mediated crypto-portal.

The platform reverses the content to consumption value transfer, thanks to its upfront multi-party funding protocol. This scalable and transparent capital reversal model ensures maximum foundation security, without compromising best-in-class trustless payment collection.

Our supply constrained approach to journalism ensures a self-correcting market mechanism for news dissemination, incentivised by the coin distribution dynamics of Alphachains smart contracting.

Alphachain believes funding its principals, while adhering to a self-referential governance framework, is the foundation of a party-to-party hack network.

For this reason, we are launching an initial coin offering on August 1st, the day of our crypt-dependence. Each coin, or token, offers its owner a perpetual subscription to the Alphachain publishing network. Tokens are fully fungible in a Turing-complete context, enabling subsequent resale or lease transactions with Zero-Day settlement invulnerability.

The initial offering will be un-capped, meaning the more tokens sold, the more readers will be able to access our stories, and hence the more value ascribed to our content. This will increase the desirability of the tokens, allowing readers to share in the value uplift built into the Alphachain system.

Alphachain represents a quantum leap upward in platform-rigorous crypto-publishing. Smile with us on this exciting and profitable endeavour into the techno-future.

**Disclaimer**

1. Alphaville may or may not be inclined to build the Alphachain network. This paper does not represent an obligation, promise, duty, suggestion or implied contract to do so.
2. The Alphachain tokens do not have any rights, uses, purpose, attributes, functionalities or features, express or implied, including, without limitation, any uses, purpose, attributes, functionalities or features on the Alphachain Platform.
3. The proceeds of the Alphachain initial coin offering may be used for any purpose, stated or otherwise.
4. Alphachain tokens are not securities, commodities, swaps on either securities or commodities, or similar financial instruments. They are not designed for investment or speculative purposes and should not be considered as a type of investment. The tokens are not available for purchase by the residents of any country.
5. The value of tokens may go up, up a lot, up a great deal, or up a tremendous amount. It is also possible they may not, or be subject to diminished prices. No prediction or forecast should be inferred, tendered or predicated on any of the aforementioned statements.
6. Alphachain tokens are not emoluments.
